

Conventional Mammography VS Full-Field Digital Mammography

ADVANTAGES OF DIGITAL MAMMOGRAPHY

-  *Lower radiation dose to breast*
-  *Shorter exam time*
-  *Less repositioning*
-  *Computer Aided Detection*
-  *Better visualization of dense breast tissue and calcifications*
-  *Better visualization for younger patients and women that are under the age of 50*

Digital Mammography systems with Computer Aided Detection (CAD) allows physicians to detect and diagnose breast cancer earlier and more precisely...
